

***Faculty Development Showcase Week:
LLU Placement Program for Prelicensure Student Nurses***

In order to provide work experience for non licensed students prior to graduation, a Student Nurse Assistive Personnel (SNAP) Program has been developed; this is a collaborative effort between Loma Linda University (LLU) and Loma Linda University Medical Center (LLUMC). This experience provides a potential pool for future recruitment for nurses at LLUMC. Further, real life experiences for student nurses are provided while facilitating and enhancing the care of patients within LLUMC.

The participant will:

1. Describe Student Nurse Assistive Personnel (SNAP)
2. Relate the purpose of the collaboration between LLU and LLUMC in relation to SNAP

How We Learn

By

What do theories tell us, and why do we care?
